Product description

DuPont™ Tychem® 2000 SFR hooded coverall (QS127T): chemical and secondary flame protection in a lightweight garment, intended to be worn over primary flame-resistant garments.

Sizes Small to 7X-Large. Option code: 00.

Key benefits

- Will not ignite in a flash fire and will not contribute to additional burn injury when appropriate FR PPE, such as DuPont™ Nomex®, is worn beneath
- Designed for dual hazards: chemical splash and flash fire
- Fabric does not char like traditional secondary FR technologies; it is designed to shrink away from flame without burning
- Engineered to perform in flame engulfment: ASTM F1930 manikin testing, 4 s exposure over a Nomex® IIIA 6 oz/yd² coverall, showed 9.3% predicted body burn
- Effective barrier against a range of inorganic acids and bases, industrial cleaning chemicals and particles

Typical applications

- Refineries
- Petrochemical plants
- Laboratories
- Hazardous maintenance operations
